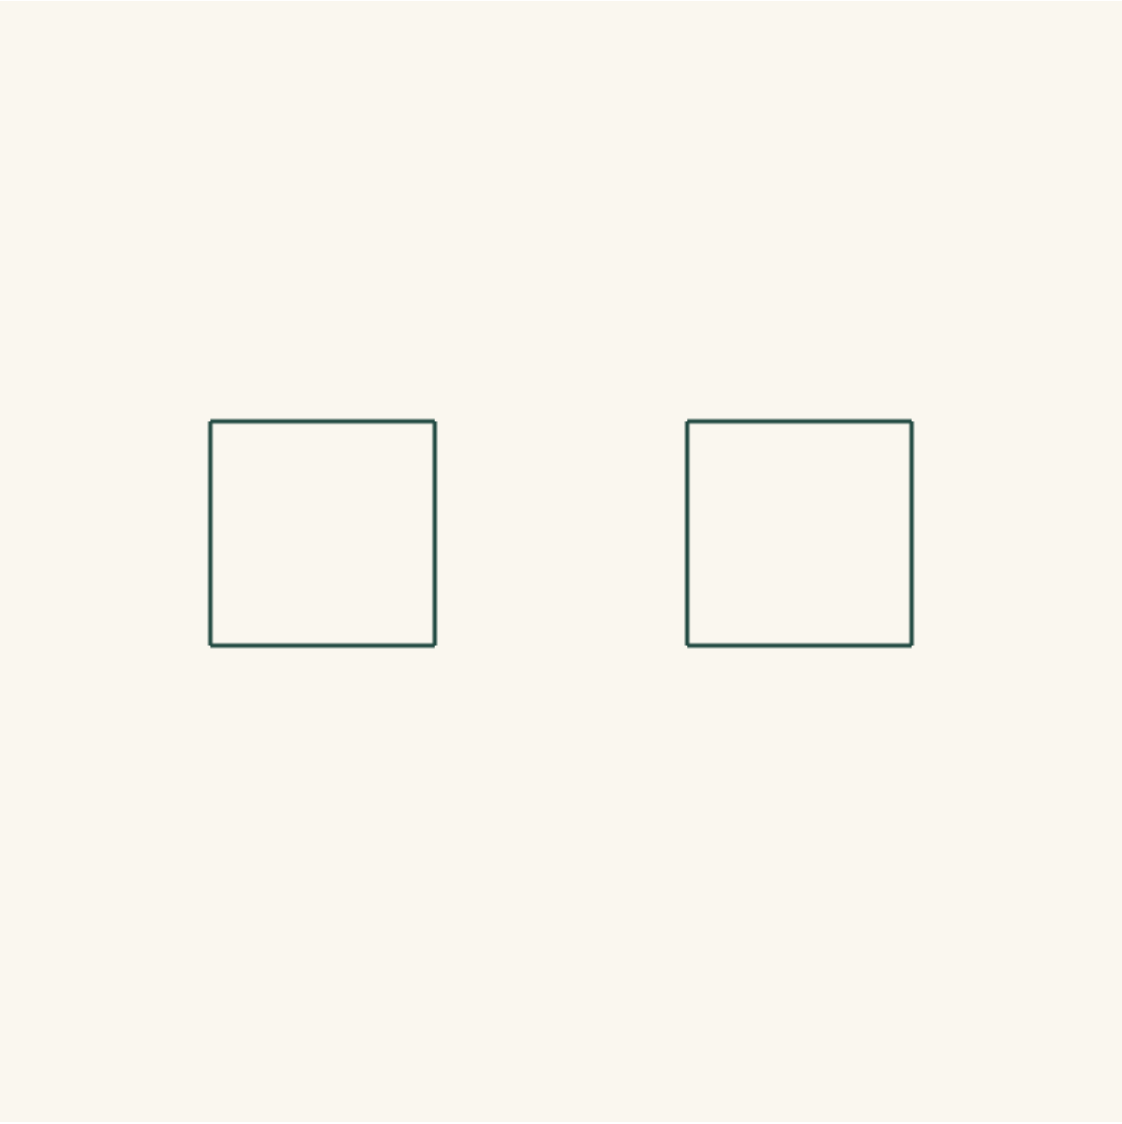
What connects them?

1. Keep both original squares visible, equally sized and in their original relative positions.

2. Add around or inside them. Do not cover or erase an original edge.

3. Whole-starter rotation and uniform resizing are allowed; moving one square is not.

4. Make a relationship visible: support, exchange, cause, comparison or representation. Add at least two clues.



What did you see first? What changed when you looked again?
