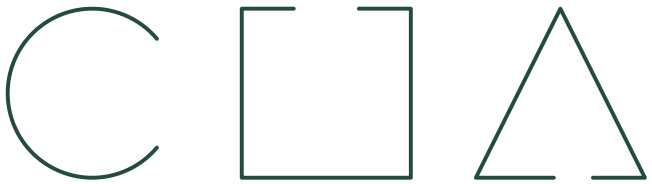
What's missing?

Keep the three incomplete outlines and their gaps. Add surrounding clues that suggest something absent or hidden, without drawing the missing thing or completing the outlines.

Keep every original mark visible and in the same relative position. Rotate or uniformly resize the whole starter only.

Keep all three gaps open. Do not draw the missing thing or complete the outlines.

Imagine three ideas, then develop one. Rough sketches and written ideas are welcome.



Reflect: Which clue suggests the missing thing? Could another explanation fit?

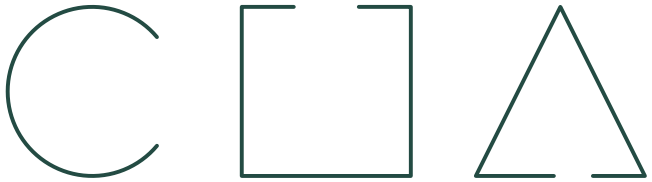
Another possibility

Challenge 09 / What's missing?



My first assumption:

What changed when I looked again?

Starter description: Three incomplete outlines sit side by side: a circle open on its right, a square missing part of its top edge, and a triangle with a gap in its lower edge.
